We do well when we do good

Based on a simple belief that people, planet, and profit work to ensure a better future, Pioneer Millworks operates on the triple bottom line. We strive to keep our carbon footprint small; our roofs house 100kW solar arrays and our wood scraps keep us warm. One percent of our reclaimed teak sales are donated to conservation causes on the island of Borneo. Our American Prairie sales support domestic barn and historic preservation. Our products are FSC-certified, LEED point eligible, and in many cases diverted from landfills. Your purchases are what make this crazy ride possible, *thank you.*

Serving great clients across North America from OR & NY.

 RECLAIMED & SUSTAINABLE WOOD PRODUCTS

Thoughtful Sophistication

Thoughtful Sophistication

THE OTHER SIDE OF RECLAIMED & SUSTAINABLE WOOD

This collection goes beyond the barn with options that are sleek and modern with a soul; giving you the freedom to innovate with sheen, color, and texture. Options for flooring, paneling, and fixtures—all with the eco-loving and LEED benefits and that make your projects sustainable.
